### Safe Money: Weighing Savings Options in a Low-Interest Rate Environment

Keeping money in an account whose interest rate hovers below 1% may not hold much appeal in a world where return on investment is king and memories of much higher rates linger. But even amid the current prolonged period of exceedingly low interest rates, there are compelling reasons for consumers to keep cash in a vehicle such as a savings account, money market account or certificate of deposit (CD).

“Having three to six months of cash accessible in some type of savings account for emergencies is essential,” says Ashley O’Kurley, a certified financial planner based in Miami, Fla., “for the liquidity, flexibility and mobility that come with it.”

Think of the money residing in such an account as an investment designed not to generate financial return, or yield, so much as one that provides a vital safety net to cover up to six months of living expenses in case of a lost job or other type of unforeseen financial crisis, O’Kurley suggests. “We have to temper our desire to get a big yield on every dollar we have. The first lesson of Financial Planning 101 is to have cash on hand for emergencies.”

While yield is a secondary consideration in choosing between a CD, a money market account, an online or brick-and-mortar savings account, or some other vehicle to house “safe money,” the decision about where to stash that cash does have important financial ramifications, he explains. “You can earn hundreds of dollars for yourself over time simply by moving money from an FDIC-insured checking account where it’s earning nothing to a high-yield savings account where it can earn 80, 90 even 100 basis points (100 basis points equates to a 1% interest rate), that’s also FDIC-insured.”

Since the priority for an emergency cash reserve is not only ready access to funds but the safety of those funds, he suggests putting it in a vehicle that's FDIC-insured, meaning it's backed by the Federal Deposit Insurance Corporation, a government entity, for a specified amount — typically \$250,000. So if the institution holding the account fails for any reason, FDIC backing assures the account holder still will be able to recoup their money.

Which type of FDIC-backed savings vehicle is best in the prevailing low-interest-rate environment? Here's a look at the options:

**Online high-yield savings account.** Today the savings accounts with the highest rates — sometimes 1% or perhaps a tick above — are often found online. “Online savings accounts end up being the best solution in many cases,” says O’Kurley. However, be aware that these accounts come with moving parts. Some carry attractive initial rates that quickly revert to less attractive lower rates. Others couple a relatively high interest rate with a higher minimum balance. Given these distinctions, it pays to spend some time comparison-shopping, with [www.bankrate.com](http://www.bankrate.com) a good place to start.

**Savings account from a brick-and-mortar bank.** People who prefer to do their banking offline, person-to-person, may prefer to open a savings account at a local bank. They’ll likely earn a lower interest rate as a result.

**Certificate of deposit.** Gone are the days when interest rates for short-term three-month or six-month CDs consistently and substantially exceeded those of traditional savings accounts. These days, securing a higher interest rate with a CD often means committing to keep money in the account longer term — for one, three or even five years. Thus CDs limit flexibility, as the extra return they provide can be quickly erased by penalties for early withdrawal. The trade-off — sacrificing accessibility to that cash simply to earn a little extra money in interest — often isn’t worth it, O’Kurley says. “CDs are what they have always been: FDIC-insured accounts you get from a brick-and-mortar bank. But you’ll give up liquidity to get one.” Parking money in a CD for several years also comes with interest rate risk. Should interest rates rise, a lower rate would still apply to the money inside the CD, precluding the CD owner from earning a higher rate on that money. People who are willing to live with that risk while sacrificing a measure of liquidity with a CD can comparison-shop at [www.bankrate.com](http://www.bankrate.com).

**Checking account.** While most checking accounts are FDIC-insured and some pay interest, not only do their interest rates rarely match those of savings accounts (particularly online savings accounts), they also may come with a range of restrictions and requirements, including minimum initial deposits, transactions fees and other costs that can add up quickly. For those reasons, checking accounts typically are better suited to house money you intend to spend, not save.

**Money market account.** As with CDs, money market accounts no longer hold much of an interest rate edge over savings accounts, which is why O’Kurley says he rarely recommends them to clients. While they could regain that edge when interest rates bounce higher, there’s no telling when that may happen. Still, because most money market accounts are FDIC-insured, as modest as their interest rates are, they remain a viable, if lower-yielding, option for stowing “safe money.”

## Please access our free October Educational Webinar:

### “Saving for the Future”

#### Presented by Christine Luken

Many people do not have a healthy level of savings, despite knowing the importance of having money set aside for emergencies, purchases, college, and retirement. In this webinar, you will learn how to utilize Emotionally Charged Saving techniques that will motivate you to set and keep your savings goals. Some of the topics covered include: Savings, Your Financial Shock Absorbers, How Spending and Saving are Actually Two Sides of the Same Coin, The Reasons to Save, Why Willpower is Overrated, Positive + Negative Emotion = Massive Motivation, and The Power of "Mindless Saving". Please go to [www.espyr.com](http://www.espyr.com) to view this webinar. Log in using our password, click on “webinars” and select the featured webinar.

*“Please feel free to submit questions relevant to the webinar throughout the month. The subject matter expert will answer these questions and they will be posted alongside the webinar recording. The questions and answers will be a permanent part of the webinar archive to which you will have access.”*

Our webinars now have an enhanced process. Each month, the webinars are released in a recorded format and users may submit relevant questions throughout the month. All answers are posted alongside the recording by the subject matter expert. This new process allows all participants the convenience of watching the webinar **“on demand”** any time after publication.

For additional online information and resources about maintaining well-being and wellness as well as trainings and self-searches for child and eldercare resources, please go to [www.espyr.com](http://www.espyr.com) and log in using your password. If you do not know your password, please send an email to [password@espyr.com](mailto:password@espyr.com) and include the name of your employer.
